

We are Church Austria

We are Church Austria greets the people from different world-wide organisations for reforms in the R.C. Church united in Rome to accompany the world Bishops' synod with their statements and actions.

We are convinced that the Bible, the First and the Second Testament, is the central source of our belief. We are also convinced that it is necessary to render its essential message of love and humanity understandable to women and men of the 21st century in words and symbols that refer to their lives. The Church is called to be an authentic contemporary embodiment of this central message of love and humanity in its teaching and structures, but we all know – and suffer from it – that the leading men of the hierarchy rather turn the church-clocks back 100 or so years and, contrary to Pope John XXIII and Vaticanum II, try to shut the doors and windows of the Church on the modern world.

We support your endeavours to demonstrate, as members of the people of God, for a good way of our Church into the future, we are with you in our thoughts and prayers and wish you the accompaniment of the Holy Ghost. May SHE also be present at the Bishops' synod!
